Fintech Hackathon

LONDON · 13 OCTOBER 2026
SINGAPORE GLOBAL NETWORK × GENERATE AT LSE

FIELD GUIDE NO. 01 · THE JUDGE · 20:30-21:20

Ninety seconds, four questions.

Every team gets one demo of 1:30 and the same four criteria. Your job is not to find the most impressive build. It is to find the team that solved a real money problem for a real person, and showed it.

FIELD GUIDE NO. 01 · FOR THE PANEL: NUAN ZHANG · TILL TORNIEPORTH · ANNA ZVERKOVA · LUKA DADIANI · THE JUDGE

1 THE NIGHT IN FOUR ROUNDS

TARGET TIMES

20:30 · REVIEW YOUR SHARE
Entries close. Watch each demo once, to 1:30. Score four criteria, then swipe: contender or pass.

20:50 · PICK ONE PER TRACK
Your best entry in Payments, Access and Fraud. No pick? Your top score stands in.

20:55 · SHORTLIST
The panel scores every pick. The top six, at least one per track, present live.

21:05 · FINALS AND RESULTS
Score each live demo. One winner per track, plus one overall. Announce at 21:20.

2 THE SCORING RUBRIC

1 TO 5 PER CRITERION · WEIGHTED TO 100

30% · REAL-WORLD IMPACT
A named person, a real money problem, a reason it matters now.
A 5: "Traders wait nine days for payouts. This makes it same-day."

25% · ORIGINALITY
What is new, in one sentence. Not a chatbot over a statement.
A 5: could not have existed two years ago.

25% · EXECUTION & CRAFT
One flow, start to finish, on screen. Proof beats polish.
A 5: real-looking data, no dead ends.

20% · TRUST & RESPONSIBILITY
What could go wrong with money or data, and what they did about it.
A 5: says what is mocked, stored and who could be harmed.

i AT A GLANCE

PORTAL
shiptonight.com/judge
Open your link once. It remembers you.

KEYBOARD
1 2 3 4 5 ← → ↓
Score, then pass, contender or later. On a phone: tap and swipe.

THE 1:30 RULE
Stop at 1:30, even mid-sentence.

CALIBRATE
Score alone, talk after. Revisit your first two videos; early ones get marked down.

CONFLICTS · TIES
Linked to a team? Say so, step out. Ties: higher Real-world impact wins.

3 REWARD, RESIST

PROOF OVER POLISH

✓ REWARD

- **A named person** and their problem in the first 20 seconds
- **One complete flow**, working on screen
- Re-use of real rails: Open Banking, bureau data, a bank's own app
- Teams that say **what is mocked** or not built yet
- Decisions explained in words a customer would understand

× RESIST

- A slick interface with no clear user
- Four half-built paths instead of one finished one
- Tours of the tech stack, team CVs and slides
- Yet another scam checker, unless it shows what is new
- Marking your first videos harshly: revisit them at the end

4 FIVE QUESTIONS FOR FINALISTS

LIVE Q&A · ONE EACH, THEN MOVE ON

1. Who exactly is this for?
   One person, not a market segment.
2. What did you build tonight, and what did you re-use?
3. What breaks first with real customers or real money?
4. If this works, what could go right at scale?
5. What is mocked, and what would make it real?
   Ask every team the same set: upside and risk, not one or the other.

"Ambition is not the signal. Judgment under a constraint is the signal."

MAGOMED KURBAITAEV · NOTES FROM A YEAR OF HACKATHON JUDGING

REAL PEOPLE.
REAL MONEY.
REAL PROOF.
